RisKontrol® your 'must have' for safe, aseptic procedures

METAL TIPS

It is impossible to clean the inside of reusable tips adequately due to the presence of biofilm.(1)

(1,2) Data on file

"With regard to cleaning and sterilization, disposable tips were found to be more acceptable in clinical use than metal tips.(1)"

Save time & money in your daily basis practice

- Single-use
- Avoid cleaning and sterilization steps

Ensure your clinical protection **20 times less** risk means more safety and serenity on a daily basis, for safe care and greater patient satisfaction.

Protect your patient **Single-use =** reduced risk of direct or cross-contamination

- Minimise the spread of viruses

Expasyl Exact Gingival Retraction Paste

Expasyl™ Exact paste provides excellent benefits with little risks. Its viscosity has been carefully calculated to open the sulcus effectively without damaging the epithelial attachment. Your procedure is both safe and effective.

- Expasyl™ facilitates access to the preparation limits and emergence profile for perfect impressions
- The compound opens the sulcus and dries it (blood, saliva and fluids) completely
- Cost-effective = no waste of material
- Works with composite applicator gun

BUY 4 x Expasyl Exact Boxes of 20 or 50 Get 40% DISCOUNT off RRP

SERVOTOME

Experience the benefits of electrosurgery

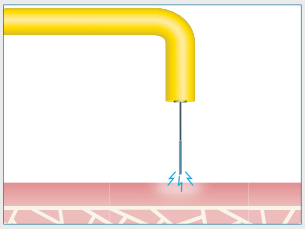

MADE IN FRANCE

High frequency electrosurge or orthodontics, periodontics and other oral surgery with a single footswitch, a box with 10 electrodes & a conductive bracelet.

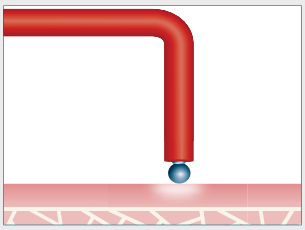

Electrosection
Vaporizing the tissue with the active electrode makes it possible to cut quickly without damaging the edges of the incision.

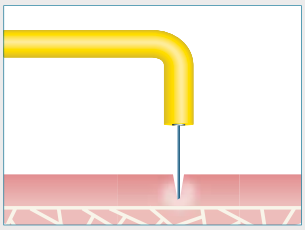

Fulguration
Makes it possible to surface coagulate gingival tissue while protecting the underlying layer.

Coagulation
Concentrating energy at the surface of a massive electrode makes it possible to diffuse the heat to the surrounding tissue and produce instantaneous hemostasis.

PIEZOELECTRIC SURGERY IS POWERFUL ENOUGH TO CARRY OUT EXTRACTIONS AT THE SAME SPEED [1] AS ROTARY INSTRUMENTS!

Socket preservation [9]
Safe for soft tissues
Recommended for immediate implant placement
No force needed
50% less pain & swelling [2]
98% less analgesics intake [1]
